

Faith Janitorial Service, LLC

Located in Gulfport, Mississippi, Faith Janitorial Services, LLC is owned and operated by Eddie Brown. The firm offers an array of janitorial services that range from construction clean-up to waxing and stripping floors. Faith Janitorial Services, LLC has been in business for 26 years and a certified DBE for 3 years. Brown takes pride in working with a team that is reliable, dependable, and trustworthy.

Brown worked for a cleaning company from 1989 to 1993 before starting his own business. With many years of experience, the firm has worked with a variety of clients over the years that include churches, municipalities, and a host of companies. Currently, the firm is providing cleaning services for Harrison County Department of Human Services, Gulfport Transit Authority, and the Armed Forces Career Center. In reference to future jobs, Brown will continue to bid projects within his area of expertise.

Brown expressed what makes his company unique. "I think our timeliness, competitive pricing, dependability, quality of service, and being one of the oldest cleaning companies in Gulfport, MS, sets us apart from other businesses," said Brown. He also mentioned that he and his team put forth maximum effort to successfully complete each job.

Brown has become very knowledgeable throughout his work experience and leaves a word of advice to fellow DBEs and small businesses alike. "Always remember to be loyal and do what you say you are going to do and let your work stand out for you," said Brown.

A MISSISSIPPI SUCCESS STORY

Mississippi Yard Barber

Located in Madison, Mississippi, Mississippi Yard Barber is proudly owned and operated by Clemie Stewart, Jr. The firm offers a wide range of landscape services that include mowing, gardening and irrigation systems, leaf and debris removal, trimming as well as a new fertilization and weed control program. The firm's ultimate goal is to provide clients with lasting lawn perfection and the highest quality of professional lawn care services.

With nearly ten years of experience, the firm continues to grow. "Over the past year, I was able to pick up another commercial contract and I'm excited about my new fertilization and weed control program," said Stewart. In addition, one of the largest contracts the firm was awarded included a Jackson Airport project. Currently, Mississippi Yard Barber is servicing the Mississippi Wild Life and Fisheries, Enterprises (Jackson, MS locations), as well as the Jackson Airport. Stewart plans to continuously and aggressively bid projects that fit his area of expertise.

Using resources (organizations, agencies, etc.) at hand for assistance can prove to be advantageous to almost any company. "MDOT DBE Supportive Services/Systems Consultants have helped me tremendously by keeping me abreast of upcoming contract opportunities and much more," said Stewart.

Having a positive impact in the lives of others is also important to him. Stewart said that he is grateful to be able to help his workers provide for their families as well as pass knowledge to others.

When it comes to sustaining and maintaining a successful business, Stewart stated that his top three factors are keeping God first, having good workers, and building good relationships with clients and bankers.

Styling Your Life Solutions

We are half-way through the year and it's time to conduct a realistic assessment. There's one question to ask yourself: Is what I'm doing in 2019 yielding better results for my business?

It is debatable if you are successful doing the same thing, year after year. Your pocketbook may say so; however, if you continue to do the same thing over and over, you may be leaving money on the table. Perhaps this is true if your business is food.

People love what they love. However, if your business is not food, you probably can't succeed in 2019 doing the same things as you did in 2018. Customers are sophisticated. Consequently, if you want to improve your business, you'll need to improve or enhance your marketing efforts.

First Smart Solution:

Subscribe to Charles Darwin's theory of change: "It's not the strongest of the species which survives, nor the most intelligent. It is the one that is most adaptable to change." I love this quote because it clearly illustrates that you have to look at the landscape and change accordingly. For example, if you don't have a background in technology, then it's best to hire someone who can rank your website using search engine optimization.

Second Smart Solution:

Always look for new customers. Consider reaching a broader audience with a highly-targeted paid social media strategy. Your social media (Linked-In, Facebook, Instagram, etc.) needs to be updated consistently so your brand goes out to more people. It's about reaching people and then drawing them into your world.

Third Smart Solution:

Consider placing a live chat option on your website. The chat will help facilitate answering questions. Another option is use pop-ups that will collect the visitor's email, as well as answer questions. In turn, you may want to consider giving your visitor a brief article which you've written about what you are selling.

Fourth Smart Solution:

Use email marketing to inform your clients if you're having a sale, promoting a special event, or offering a tip of the day or week. All of these methods may generate effective leads and will definitely generate top-of-the mind thought.

OSHA Safety Tip of the Month!

Worker Fatigue

Long work hours and irregular work shifts are common in our society. Nearly one-quarter of American workers spend over 40 hours a week at work and almost 15 million work full time on evening, night, rotating or other irregular shifts. Work schedules like these may cause worker fatigue.

Shift workers may be scheduled to workdays, evenings, nights and/or on a rotating or on-call basis. They may work extended shifts (more than 8 hours long), rotating or irregular shifts, or consecutive shifts resulting in more than the typical 40-hour work week. Long work hours may increase the risk of injuries and accidents and can contribute to poor health and worker fatigue.

Fatigue is a message to the body to rest. It is not a problem if the person can and does rest. However, if rest is not possible, fatigue can increase until it becomes distressing and eventually debilitating. The symptoms of fatigue, both mental and physical, vary and depend on the person and his or her degree of overexertion. Some examples include weariness, sleepiness, irritability, depression, headache, giddiness, and lack of motivation.

When there is a choice, managers should limit the use of extended shifts and increase the number of days employees work. Working shifts longer than 8 hours will generally result in reduced productivity and alertness. Additional break periods and meals should be provided when shifts are extended past normal work periods. Tasks that require heavy physical labor or intense concentration should be performed at the beginning of the shift if possible. This is an important consideration for pre-emergency planning.

Managers and supervisors should learn to recognize signs and symptoms of the potential health effects associated with extended and unusual work shifts. Workers who are being asked to work extended or irregular shifts should be diligently monitored for the signs and symptoms of fatigue. Any employee showing such signs should be evaluated and possibly directed to leave the active area and seek rest.
