

Cook Development, LLC

Cook Development, LLC is located in Aberdeen, Mississippi and is owned and operated by Lindsey Cook. The firm specializes in commercial and residential building construction such as new build vertical and horizontal construction, renovations, additions and design-build. The firm has been in business for 10 years and is a recently certified DBE. In addition, the company is 8(a) and HUBZone certified. Cook Development LLC is dedicated to providing superior construction services to potential and valued clients as well as surpassing the highest standards set in the construction industry.

Cook was inspired from an early age to continue his family's legacy within the construction industry. "Both my father and grandfather were contractors and I was able to gain experience at a young age which allowed me to create my own business," said Cook.

The firm has successfully completed construction projects throughout Mississippi and Alabama. Cook Development, LLC has worked with the Columbus Airforce Base installing and removing floors (26,000 square feet) along with a host of other jobs that have including a design build for Friendship Baptist Church (AL). Currently, the firm is working on a design build project for Boss Hogs BBQ Restaurant also located in Alabama. Cook says that he plans to continuously bid projects within his area of expertise.

Almost every business strives to be different from others. Cook explained how his character and integrity differentiates his company. He also mentioned the importance of keeping his customers first.

In an ever-changing and growing industry, he understands the challenges and triumphs of being a small business owner. Therefore, he leaves a word of advice for DBEs and fellow entrepreneurs. "Stay the course because there will be ups and downs. Believe in what you set out to do and everything will work out for you," said Cook. For more information about this firm, please forward all correspondence to Lindsey Cook at 662-631-0037 or contact@cookdevelopment.com. You can also visit the firm's website at www.cookdevelopmentllc.com.

A MISSISSIPPI SUCCESS STORY

AA Calibration Services, LLC

Located in Yazoo City, Mississippi, AA Calibration Services, LLC is owned and operated by Larry White. The firm offers calibration services for pressure gauges, calipers, dial indicators, torque wrenches, multi meters (digital and analog), tension meters, scales, height gages and more. AA Calibration Services, LLC is committed to providing service advantages with response, high quality, and affordable solutions to customers.

AA Calibration Services, LLC has extensive experience supporting government agencies and other private and public industries. The firm has worked with various entities such as AHK (Mississippi Nissan Supplier), Milwaukee Tools, Electro National and many more. Also, one of the largest contracts awarded to the firm included a \$240,000 calibration project for L3 Technologies. Recently, AA Calibration Services, LLC has worked with Continental Tires (Clinton, MS), calibrating machines, equipment, and tools used on a daily basis. White provided his strategy to obtaining work with Continental Tires.

Of course with every project there are phases. White knew that once the plant was constructed that there would be a tremendous need for calibration. First, he said that he communicated his firm's capabilities and stayed in contact with lead decision makers. Secondly, he made sure to attend all conferences and networking opportunities which allowed him to follow-up and communicate face-to-face. In reference to the bidding process, White stated that it was more about meeting a need, vicinity, and being available when Continental called. He also mentioned the assistance of MDOT DBE Supportive Services. "The team was very instrumental because they provided the opportunity to meet with Continental's Operation Manager," said White.

Owning a successful business has given him the chance to realize that his childhood dream has come true. It also allows him to have a positive impact on the local economy and give hope to others who aspire to build their own company. The entire process is not easy but it is worth it. He provides his top three factors in obtaining and sustaining a successful business. "It is vital to be patient, use the resources available to you, and pay attention to details," said White. For more information on this firm, please forward all correspondence to Larry White at 662-716-0202 or larrywhite@aacalibrationservices.com.

Benefits of Systems DBE Supportive Services

Systems
Consultants
Associates

1. Business Plan Assistance

A business plan is universally considered key to sound business preparation. Supportive Services provides comprehensive assistance with a client's business, strategic and/or action plan development.

2. General Contractor Study Material

Wanting to sit for the general contractor's exam? The Supportive Services office provides free study support for that and the Mississippi business law exam.

3. Bidding & Estimating Software Access

Wanting to improve bid accuracy? Clients get access to select bidding and estimating software, that supports most construction trades.

4. MDOT Bidding Process Navigation

MDOT only accepts online bids and learning a new software application can be daunting. Supportive Services helps its clients navigate MDOT's online bid process.

5. Social Media Assistance

Too little time to get your business involved in social media? For the client interested in a digital marketing strategy, Supportive Services can assist in developing and maintaining social media advertising to help increase profitability.

6. Business Advisor Access

Supportive Services has a team with 60 plus years of business, financial, project management, human resources and marketing knowledge and experience eager to help its clients increase their business success.

7. Customized Support

Supportive Services recognizes that no two companies are exactly alike. It assists clients through developing customized growth strategies to improve profitability.

8. Workspace Availability

Clients can access temporary work space, free wifi, office support equipment (printers, media, etc.), and human resources. The Supportive Services office becomes an extension of a client's office.

9. Connections to External Resources

Having the right resources is important to overall company development. Supportive Services connects its clients to external resources, such as bonding, financing, training and other business assistance.

10. Opportunities and Bid Lists' Access

Contractors generally have little time to seek work. Monthly, Supportive Services clients receive an easy-to-navigate list of bid opportunities delivered directly to their inbox, limiting search time.

11. Human Resources Counseling

Whether advocating on your behalf or helping find additional employees or subcontractors, the Supportive Services staff become a vital part of your team

12. Customer-base Expansion Support

With the client's goal of finding new customers and winning contracts, the Supportive Services team arranges strategic meetings, workshops, and networking events to help the client promote its business expertise and build capacity.

13. Marketing Assistance

If buyers don't know you exist, then expanding your business is difficult. Effective marketing is essential.

What is Cloud Computing?

Cloud computing is the on-demand delivery of compute power, database storage, applications, and other IT resources through a cloud services platform via the Internet with pay-as-you-go pricing. Whether you are running applications that share photos to millions of mobile users or you're supporting the critical operations of your business, a cloud services platform provides rapid access to flexible and low-cost IT resources. With cloud computing, you don't need to make large upfront investments in hardware and spend a lot of time on the heavy lifting of managing that hardware. Instead, you can provision exactly the right type and size of computing resources you need to power your newest bright idea or operate your IT department. Cloud computing provides a simple way to access servers, storage, databases and a broad set of application services over the Internet. A cloud services platform, such as Amazon Web Services and Microsoft Azure, owns and maintains the network-connected hardware required for these application services, while you provision and use what you need via a web application.

Types of Cloud Computing

Cloud computing provides developers and IT departments with the ability to focus on what matters most and avoids undifferentiated work such as procurement, maintenance, and capacity planning. As cloud computing has grown in popularity, several different models and deployment strategies have emerged to help meet specific needs of different users. Each type of cloud service and deployment method provides you with different levels of control, flexibility, and management. Understanding the differences between Infrastructure as a Service, Platform as a Service, and Software as a Service, as well as what deployment strategies you can use, can help you decide what set of services is right for your needs.

Cloud Computing Models:

Infrastructure as a Service (IaaS): contains the basic building blocks for cloud IT and typically provide access to networking features, computers (virtual or on dedicated hardware), and data storage space. IaaS provides you with the highest level of flexibility and management control over your IT resources and is most similar to existing IT resources that many IT departments and developers are familiar with today.

Platform as a Service (PaaS): removes the need for your organization to manage the underlying infrastructure (usually hardware and operating systems) and allows you to focus on the deployment and management of your applications. This helps you be more efficient as you don't need to worry about resource procurement, capacity planning, software maintenance, patching, or any of the other undifferentiated heavy lifting involved in running your application.

Software as a Service (SaaS): provides you with a completed product that is run and managed by the service provider. In most cases, people referring to Software as a Service are referring to end-user applications. A common example of a SaaS application is web-based email which you can use to send and receive email without having to manage feature additions to the email product or maintain the servers and operating systems that the email program is running on.

OSHA Safety Tip of the Month!

Work Zone Traffic Safety

Workers being struck by vehicles or mobile equipment lead to many work zone fatalities or injuries. Work zones need traffic controls identified by signs, cones, barrels and barriers. Drivers, workers on foot, and pedestrians must be able to see and understand the proper routes. Construction project managers determine traffic control plans within construction/demolition worksites.

- Traffic control devices, signals, and message boards instruct drivers to follow paths away from where work is being done.
- Approved traffic control devices, including cones, barrels, barricades and posts, are also used inside work zones.
- Work Zone Protections: Various concrete, water, sand, collapsible barriers, crash cushions, and truckmounted impact absorbers can help limit unauthorized entry by motorists into construction work zones.
- Flagging: Flaggers should wear high-visibility clothing with a fluorescent background and made of retroreflective material. This makes workers visible for at least 1,000 feet in any direction. Check the label or packaging to ensure that the garments are performance class 2 or 3. Drivers should be warned with signs that there will be flaggers ahead. Flaggers should use STOP/SLOW paddles, paddles with lights, or flags (only in emergencies).
- Lighting: Flagger stations should be well lit. Lighting for workers on foot and for equipment operators should be at least 5 foot-candles or greater. Where available lighting is not sufficient, flares or chemical lighting should be used. Glare should be controlled or eliminated.
- Training: Flaggers must be trained/certified and use authorized signaling methods.
- Driving: Seat belts and rollover protection should be used on equipment and vehicles as the manufacturer recommends.

The bidder shall make and document good faith efforts, as defined in Appendix A of 49 CFR Part 26, to meet the established goal. Award of contract is also subject to the following Federal provisions: Executive Order 11246 and DOL Regulation 41 CFR Part 60 - Affirmative Action to Ensure Equal Employment Opportunity DOL Regulation 29 CFR Part 5 Davis-Bacon Act DOT Regulation 49 CFR Part 29 – Government wide Debarment and Suspension and Government wide Requirements for Drug-free Workplace DOT Regulation 49 CFR Part 30 - Denial of Public Works Contracts to Suppliers of Goods and Services of Countries that Deny Procurement Market Access to U.S. Contractors (Foreign Trade Restriction).

HIGHLIGHTED PROJECTS FOR THE MONTH OF JUNE 2019

Montgomery County Engineering Services

Bid Date: July 12, 2019

Bid Time: 12:00 p.m.

Project Location: Winona, MS

Bids To: Montgomery County Board of Supervisors, P.O. Box 71, Winona, MS 38967

Scope of Work: Montgomery County, Mississippi, hereby requests proposals for engineering services in relation to its proposed Appalachian Regional Commission (ARC) grant application. The project consists of making improvements to an existing industrial building. The Scope of Work will consist of preparation of preliminary cost estimates, preparation of plans and specifications for advertisement of bids; evaluation of bids and recommendation of contract award; preparation of the contract in accordance with ARC, Federal, State, and local laws and regulations; conducting pre-construction conference in coordination with project administrator; inspecting construction in progress; and advising the board of supervisors and the project administrator on contractor payments.

Montgomery County is an Equal Opportunity Employer. The County encourages Minority-Owned Business Enterprises (MBEs) and Woman-Owned Businesses (WBEs) to submit proposals. Those desiring consideration should submit proposals by the time and date stated below and must include the following:

1. Qualifications – List of qualifications of each staff person to be assigned to project.
2. Experience – Information regarding the experience of the firm. This information should include types of project activities undertaken.
3. Capacity for Performance – Identify the number and title of staff available to be assigned to provide services and capacity to perform the work within the time limitations.
4. Familiarity – Knowledge of the type of problems applicable to the project.

All proposals will be rated on the following system to determine the best proposal: Description and Maximum Points: Qualifications – 30; Experience – 30; Capacity – 30; Familiarity – 30; Total: 120 points.

Proposals will be reviewed by the board of supervisors using the above selection criteria. Each member of the board will assign points to each criterion based on the content of the proposal. Negotiations will be conducted to determine a mutually satisfactory contract first with the firm receiving the highest accumulated points, as rated by the board. Final award will be made to the responsible proposer whose proposal is determined to be the most advantageous to the county. Proposals should be in a sealed envelope marked "ENGINEERING PROPOSAL – Montgomery County – 2019 Industrial Building Improvements Project." Proposals should be mailed to the Montgomery County Board of Supervisors, P.O. Box 71, Winona, MS 38967, or delivered to 614 Summit Street, no later than 12:00 p.m. on July 12, 2019.

HIGHLIGHTED PROJECTS FOR THE MONTH OF JUNE 2019

COMMUNITY CENTER PARKING LOT TOWN OF EDWARDS

Bid Date: Tuesday, July 16, 2019

Bid Time: 10:00 A.M

Project Location: Edwards, Mississippi

Bids To: City Hall 310 Front Street, Edwards, Mississippi, 39066,

Architect/Engineer: Engineer is Neel-Schaffer, Inc., 704 Hardy Street, Hattiesburg, MS 39401, (601) 545-1565, Fax No. (601) 545-2267 or email geoffrey.crosby@neel-schaffer.com.

Scope of Work: Sealed bids will be received by the Town of Edwards, at the City Hall, Mississippi, hereafter referred to as Owner, located at 310 Front Street, Edwards, Mississippi, 39066, until 10:00 A.M., Local Time, Tuesday, July 16, 2019 for supplying all labor, equipment, and materials (as specified) necessary for the construction of the above referenced project. Work consists of constructing a parking lot at the Community Center. The above general outline of features of the work does not in any way limit the responsibility of the Contractor to perform all work and furnish all labor, equipment and materials required by the specifications and the drawings referred to therein. Bidder must be qualified under Mississippi Law and show current Certificate of Responsibility issued by the Mississippi State Board of Public Contractors establishing his classification as to the value and type of construction on which he is authorized to bid. Each Bidder shall write his Certificate of Responsibility Number on the outside of the sealed envelope containing his proposal. Proposals shall be submitted in duplicate, sealed and deposited with the Owner prior to the hour and date hereinbefore designated. No bidder may withdraw his bid within 90 days after the actual date of the opening thereof.

Awarding public contracts to non-resident Bidders will be on the same basis as the non-resident bidder's state awards contracts to Mississippi Contractors bidding under similar circumstances. In order to ensure that Mississippi's so-called Golden Rule is followed state law requires a non-resident bidder is to attach to his bid a copy of his resident state's current laws pertaining to such state's treatment of non-resident contractors. The Engineer is Neel-Schaffer, Inc., 704 Hardy Street, Hattiesburg, MS 39401, (601) 545-1565, Fax No. (601) 545-2267 or email geoffrey.crosby@neel-schaffer.com. Contract Drawings, Contract Specifications, Instructions to Bidders and Bidders Proposal forms are on file and open to public inspection in the office of the City Clerk of Edwards, Mississippi and the Engineer. Copies of the Instructions to Bidders, Bid Forms, Contract Drawings and Contract Specifications may be procured at the office of the Engineer between the hours of 8:00 A.M. and 5:00 P.M., Local Time, Monday through Friday, upon payment of \$100.00 for each set, which will not be refunded. Checks are to be made payable to Neel-Schaffer, Inc. Each Bidder must deposit with his proposal, a Bid Bond or Certified Check in an amount equal to five percent of his bid, payable to the Owner, as bid security. Bidders shall also submit a current financial statement, if requested, by the Owner. The successful bidder will be required to furnish a Payment Bond and Performance Bond each in the amount of 100 percent of the contract amount. "Mississippi Standard Specifications for Road and Bridge Construction, 2004 Edition" as referred to herein, may be purchased from the Mississippi Department of Transportation.
